

Variable Area Flowmeter, Plastic

Construction

The flowmeter operates according to the variable area principle. Metering tubes are available in PA transparent or Polysulphone suitable for inert or corrosive* media (PVC-U and PVDF tubes on request). Male threads moulded onto the ends of the metering tube allow for easy mounting of unions. O-ring seals at the faces of the tube ensure reliable sealing between metering tube and union and provide stress-free sealing. The floats are available in stainless steel 1.4571, PVC-U, PP or PVDF (depending on working medium and measuring range). The scale on the metering tube can be suited to the medium and is available e.g. in l/h, m³/h or %. Dovetail sections moulded onto the metering tube allow for easy mounting of adjustable visual flow indicators, limit switches and a continuous readout transmitter.

Advantages

- Good level of accuracy, simple operation
- Corrosion resistant
- Over 500 standard scales and 13,000 special scales are available with further scales on request
- Clear and large size printed scale
- Versions according to ATEX available on request

* see information on working medium on page 2

Technical data

Working medium

Corrosive and inert gaseous and liquid media which have no negative impact on the physical and chemical properties of the metering tube, float, seal and union materials.

Operating pressure*

Metering tubes with plastic unions	max. 10 bar
Metering tubes with metal unions	max. 15 bar

*Operating pressure dependent on tube material and operating temperature

Accuracy class

4 acc. to VDE/VDI 3513, sheet 2, i.e. $\pm 1\%$ of end value and $\pm 3\%$ of measured value.

Tube size	Code
See tables on pages 4 and 5	

Measuring range	Code
See tables on pages 4 and 5	
Always state the maximum measuring range value when ordering.	

Note:

The scale divisions given on pages 4 and 5 correspond to the actual flows.
When ordering, the flow ranges should be stated as follows:
Liquid media: l/h
Gaseous media: Nm³/h

Ordering information:

The following data are necessary:

1. Type of medium
2. Concentration of medium (%)
3. Required flow range (l/h, m³/h, kg/h)
4. Operating pressure, relative or absolute (bar)
5. Temperature of medium (°C)
6. Viscosity of medium
7. Medium density
8. Float with or without magnet

To types 825/835:

Caution! With gaseous media the scaling alters according to operating pressure. Please state when ordering.

Special scales:

For other media and operating requirements differing from those given for standard versions. special scales are available. Please note the ordering information (see page 3).

Note

All scales in this data sheet are based on a medium temperature of 20° C.

For smaller or larger flow ranges see data sheets GEMÜ 840, 850.

Accessories for variable area flowmeter series GEMÜ 800

To increase the versatility of the GEMÜ 800 flowmeter, numerous accessories have been developed which can be retrofitted onto the tube without modification.

The float, however, must be one containing a magnet, in order for these accessories to function.

GEMÜ 1250

Change-over contact
(Switching duty of magnetic switch 10 VA)

GEMÜ 1251

Limit switch (max.)
(Switching duty of magnetic switch 10 VA)

GEMÜ 1252

Limit switch (min.)
(Switching duty of magnetic switch 10 VA)

GEMÜ 1276

Digital display unit
Versions:
With or without switch points.

GEMÜ 1270

Instrument sensor for continuous flow readout (resistance 0 - 10 kΩ).

GEMÜ 1272

Instrument sensor for continuous flow readout via output signal 4-20 mA from an integrated 2-wire measuring transducer

Separate data sheets are available for the above accessories on request.

Other products from our product range:

- Plastic valves, pneumatically, electrically and manually operated.
- Metal valves, pneumatically, electrically and manually operated.

For further flowmeters, accessories and other products, please see our Product Range catalogue and Price List.
